**SolarFlow**, a balcony solar storage system designed to use the power of the sun to help you save more on your electricity bills

**Compatible with 99% micro-inverters**

Capable of connecting with 1-1, 1-2, 1-4 micro inverters. This will increase the solar input power and allow larger capacity with compatible battery.

**Up to 800W Dual MPPT solar input to PV Hub 1,200W Max. Output power to micro inverter**

**Run times**

Add up to 4 battery packs for more storage capacity.

Garden

Pitched roof

Apartment

House

**Zendure App**

- Customize power and storage in time intervals.
- Real-time energy flow tracking and energy analysis data.
- Open API, compatible with DIY smart devices like Home Assistant.
